## About me

My passion for learning new things and pushing myself has led me into the world of programming, and it has been a beautiful journey. I am a very determined person, so problem-solving comes naturally to me.

I specialize in Frontend development, where I create web applications using React JS and JavaScript, but I also have knowledge of Node JS and SQL. My professional experience as a video editor has helped me to develop excellent skills such as efficient teamwork, the ability to act under pressure, and excellent interpersonal relationships.

## Experience

### Frontend Developer

- Web pages and applications development.
- Execution of team projects using Git and Github.
- +40 courses and certifications from Platzi, Academlo, and LinkedIn Learning.

### Video Editor - Fedegán
